THE ARCHITECTURAL OUTLINE

Globoclip 150 MK3

GR0436 150W
GR0437 150W 110V

GLOBOCLIP MK3 expands gobo projection into outdoor use, with a fully weatherproofed (IP65) ultra compact body. Of course GOBOCLIP MK3 can also be used indoor and has a grey polyurethane finish allowing the unit to blend discretely into any location. Utilizing the CDM-SA/T 150W 9000-hour metal halide lamp, GOBOCLIP MK3 projects a bright and accurate rendition

of any graphic design or logo. A zoom facility combines with more inbuilt projection angle options to provide maximum flexibility with projection distance and image size. GLOBOCLIP MK3 has easy and quick metal gobo, glass gobo or dichroic filter change, with a newly fitted circuit board and stepper motor to control via DMX the rotating image speed settings. The focus and the zoom selection are similarly straightforward. Now, with GOBOCLIP MK3's outdoor projection possibilities, your advertising message can reach your target audience almost anywhere you choose.
